IMPORTANT: Sections labeled "Important" should specifically be followed to ensure satisfactory results with the product.

Place the immersion chiller into boiling wort 5 to 10 minutes before the end of your boil to sanitize. Place the drain hose down the drain. Once you're ready to chill, send cold water through the coil with the garden hose connection until it reaches fermentation temperature. Stir the wort with a sanitized spoon while cooling to increase cooling speed.

Warning: *Water coming out the drain hose will be hot.*

CLEANING AND MAINTENANCE

Clean the Foundry™ with mild unscented detergents, Powdered Brewery Wash (PBW), or percarbonate-based cleaners. For stubborn areas, we highly recommend Bar Keepers Friend to keep your product clean. Bleach should **NOT** be used to clean or sanitize stainless steel. For keeping your equipment clean and looking new, we strongly recommend cleaning immediately after brewing as soils and residue will be much easier to remove before it dries. Never toss components in a bucket of cleaning agents "to clean tomorrow" as these chemicals may damage the product if you exceed the recommended contact time.
